political clicies hore attaches to prog nostic itions concerning the approach ing Presidential contest. In fact even movement on the political observer beard at this time, in Congress and out has President making faits objective point. It is conteded to those politi that who look below the nurrace had! cutions that if nothing transpires to have some money to keep the wheels of our damage their prospects the chances of machinery in motion, and if these in the are the Democratic party to success next year are about two food. The reasons for this opinion are based upon a numbut of solid facts and substantial considerations. One is, that in the history of our Government no political parts has retained possession or the Legisla tive Executive, and Judicial Depart ments for a longer period than four Presidential terms. The people weary, ordinarily in far less than sixteen your of the same men or class of men in th same rales, and in the a change it only for the sale of a chang. This is not ticularly to man things have been going wrong if I a mess is depressed, and the country is suffering from commercial distress. For several verts the people of this nation have been weighed down han loud of evils brought mon them be had legislation and a corrupt administration of public ufairs. It is needless to particularize the missions of the present Administration, concerning which new developments are daily be log made. Grant's Southern "outrages, his parsistency in keeping corrupt men in office, the right ate executiona of public mossy and the manuer is which the interests of the country have; but been subardinated to political schemes. are among the things that have contable utid to the present unset led and dis

tressed condition of affairs Nobody can tell what changes the next six months will be one shoot. The whilshov exposure and other investiga Bens will continue to tell against the Republicany and the Democrats will gain favor by the headach did reticach ment me wance for Grant may got the country into a wit with Sprain and chimily upsit all present calculations Upon the reasonabling of Congre

GOVERSMENT REPRESENDENT.

Washington, January 5 .- Mr. Hol-

man, who is second on the Committee

on Appropriations of the House, said

40-day that, after a careful examination

of all the estimates now before the

commutee, it is manifest that the ap-

propriations can be reduced at least \$18,000,000. He proposes notice items of

tiver and harbor and public buildings

those to cut down the estimates \$5,000,-

900. In the estimates for the Post Of-

fice Department a heavy reduction is

also to be made, chiefly in the Rems of

Pestmasters' salaries and the free de-

livery of letters. The law new provides that in all cries of 30,000 inhibitants

there shall be tree delivery. It is now

proposed to limit the free delivery to

itants. The next heavy reduction is to be unide in the estimates for the army,

It is probable that the committee will

recommend a reduction of the army to 15,000 mea, with corresponding reduc.

this in the staff and general officers.

The estimates for the Indian Burea

IX O'CLOCK, EACH WEEK-DAY MORNING, and CONTINUE UN-TIL OUR FALL AND WINTER STOCK IS SOLD. THE MAIN FACT IS: We have made up too MANY OVERCOATS and SUITS for this year, and to transfer our Stock into Cash needed for preparations for 1876, we will make certain sacrifices which will be

apparent on and after WEDNESDAY, DECEMBER FIRST. when we shall have gone through our Salesrooms and cut off Profits, and even a part of the cost, from many of our present To be very exact in stating this matter, as we do not intend

that any advertisement or custom of our nouse shall mistead the public in the least particular, we think it proper to say, that this Mark Down, whilst it applies to A THOUSAND AND MORE OVERCOATS,

A THOUSAND AND MORE BUSINESS COATS, HUNDREDS OF DRESS COATS, SEVERAL THOUSAND VESTS.

SEVERAL THOUSAND PAIRS OF PANTS, extends throughout our house, yet there are some lots in which (as they have already been marked at close prices,) we shall make no change. We desire to announce that this is

OUR FINAL AND ONLY MARK DOWN THIS SEASON, So that NONE NEED WAIT for Lower Prices. The step we take will wonderfully aid those who feel like Economizing. The Terms of the Sale are the Usual Terms of Our House:

.--No second or Altered Price-ONE FIXED PRICE. 2.—Cash from All, to warrant Low Prices. 3.—The Contract on our part, to return money, is a part of the bargain in each case (provided goods are returned unworn.)

4.—A Full Guarantee given for each garment. The Stock we offer is all New, and not "Bought" or "Wholesale" stock, but our own CAREFULLY MADE CLOTHING. It will be renembered that our stock always embraces the Choicest Styles of Substantial Goods, and that Every Size and Shape is provided for both Men and Boys. It will also be borne in mind that there is but ONE OAK HALL, and that is at the corner of SIXTH-SIXTH-SIXTH-SIXTH and MARKET Streets. Hoping for a vistit from each reader, and that our friends will pass this annoucement to all their friends in the country, We are Very Truly,

FARM AND GARDEN.

HOW MUCH SHOULD A STEER GAIN. In answer to the above question a correspondent of the Country Gentle

"To obtain an answer I take the followever, have been most satisfactory. In sending data from my note book: Eleven good steers weighed 12.674 pounds; the royal and other acclediting soile turned out on good pasture Sept. Sth; ties, acld very much more diluted gained 1,046 pounds by Oct. 22; time 43 (about one cunco to the gailon) has gained 1,646 pounds by Oct. 22; time 45 days - gain or head per day, 22 pounds. Dec. 9th they had gained 560 pounds more; time 62 days—gain per head per bly have contributed to the immunity day, 2.8 pounds. By January 5th they from disease which It has been my good had made a further gain of 600 pounds; time 26 days—gain per head per day, 2.66 pounds. Weighed again March 5, they showed an increase of 752 pounds; sold, was 158 pounds. One of these steers made the greatest gain of any 1 23d, 3875, he weighed 1,540 pounds, or a available form. - Rural South Carolinigain of 610 pounds in 335 days; or 182, an pounds per day for the whole time he was fed. In several cases particular animals, or even the whole lot, have made greater gain for a short line, but none so much for the whole time fed. Running back over my experience in retient, and die from the exposure, feeding and weighing strers, I find The fall raiss are supposed to be over, their arrange gain to have been 129 and don't, nelt and beat down and

but many, I may say the large majorigood shelter, feed a few roots, a little grain, and good clover bay dally, and do not neglect water, as they need it much more in winter than summer. But many will say they will got too fat if you feed so liberally. Do not but shearing time, when sheep are scarce and high, but if in low condition, must be kept until fall when schop are plenty and chemp. It is very little use to begin a few days before the lambs are drop ped to give extra feed, as it would be From quite a number of year's expo-

rience I find it pays best to feed well from the time ewes come into winter quarters or as soon as the feed is short. mad's use and not to pass off undigest until they are turned to grass in the spring, and even a few days later. By so doing. I always avoid coated il coes, get a large increase in the comment of wool, and the quality is improved. The ewes not only nave more milk, but it any ewe but one that, is in the condi-V. W., Lawyersville, N. Y.

CRANKERRY CERTERS. become conspicuous in the cramburly business is Albion K. (files, Esq., of Alfred. He began about tour years since, the owned a bog of twelve acres, which, by the construction of drams and dykes 1 lands. The three first years he was at bog, where they are taken in screens, and there gathered. Not only are the berries gathered, but by an ingenious best going into one apartment, and the fresh egg is nicer than a stale egg; and light, pinched or ausound into others, no person will want to eat them boiled Mr. Giles must have expended nearly after having tried this method,

\$3,000 in bringing his land to its present condition of bearing, and other facilities for growing and scenting the crop. This year he harvested 600 bush els at an expenditure, of forty six days. labor. He sold, quite early in the season, 100 barrels at \$10 per harrel. The balance of the crop he will sell at \$4 to \$4.50 per bushel. It will be seen that Mr. Giles has a small fortune in the business-the result of study, patience and brains.

as 165 bushels to the acre, and a particular one-a very particular one-goes over two hundred! Two yields have bren reported to the Solebury, Bucks tionally smaller quantity of lard and county, Farmers' Club, which we do butter.

eighth of an acre yielded to bushels and storn them to the oven for a few minone quart of shelled roon, or at the rate sites, or set them in a Dukch or Ameriof 128 bushels, and 8 quarts to the acre. can oven before the fire. The other field belonged to Charles White, contained also obewer Acres. Witen insects work on the roots of which was necessed with 16 leads pur house-plants, but a few drops of carboiacte; plowed, planted and entitymed to agid in a post of water, and pour it in the same way. One eighth of an around the roots, in the same way, consider to the acre produced 15 bushels and squarts of shifted corn, or at the rate of 121 seed oil and vinegar, thoroughly applied and then rubbed with damed, 100 bushels of corn per ners.

Campoint Acto.-An English farmer writing to the Mark Lane Ermiss. says: "I beg to call your attention to a very a mple and efficient mode of using carbolic acid as a disinfectant, which I

have adopted for the last three or four years in my cow sheds, and I am glad to say, with complete success, in warding off foot and mouth disease, aling off foot and mouth disease, although on three different occusions in fected animals have been separated from my herd only by the Intervening public road. Crude carbolic acid is diluted with water in the proportion of about half a pick to a gallon of water. With this solution saw dust is there oughly wetted every mornig and strewn behind the unlimits. A very slight odor of the acid is perceptible; the results,

CLOVER AS AN ACCUMULATOR OF NITHOGEN, -- Apropes of what has time 50 days-gain per head per day, been said in regard to the biguminous 1 15 pounds. Seven of them were then plants as hilrogenous fortilizers, we find sold, the average gain per head per day it stated that Dr. Volcker, by a series of having been 1.30 pounds. At this time the most exhaustive analyses of soils and plants, has discovered and establishthe other tour weighed 5-152 pounds, and plants, has discovered and esthousismbly made again May 8th, they ed the fact that an induces amount of showed a gain of 498 pounds; time 63 airregenous food accumulates in the days—gain per local per day 1.95 soil during the growth of clover, espectively the contract of the soil during the growth of clover, espectively the contract of the growth of clover. pounds. By June 4th they had made a failty in the surface soil, amounting, in farther gam of 270 pounds; time 27 cluding that in the clover roots and days - gam per head per day, 2.5 pounds. tops, to three and a half tons of altre-Weighed again Sept. 23, they showed a gen per acre - equal to four tons and a gain of 519 pounds; time 142 days—gain third of animonia. If this be a fact, per head per day 1.11 pounds. On the the wonderful effects of clover, yelch. the wonderful effects of clover, vetch, last four the average daily gain per and similar plants on the sall censes to head, for the time after the others were in mysterious, and the farmer need no longer buy antuonia in his commercial fertilizers, but only add to the soil the lime and other ash elements required, have ever fed. Oct. 22, 1874, he weighed 1,000 pounds, and when sold, Sept. which can be cheaply furnished in

Prowing - Winter plowing is better than fall plowing in this latitude. It turns up many nexious insects, and pounds per day, on grain and postare—compact thosoit. It is turned up fresh part of the sousen on each." and the freezing and thewlog and pul-CARE OF BREEDING EWES, -Who advantage of the land. The teams are ever keep breeding ewes desire to have now fresh and vigorous, other work is the Luabs large, strong, time and fleshy, not pressing, and every week gained now in plowing, puts the farmer ahead ty, do nothing more than samply to that much in the spring. Especially wish for these things, taking none of should the land to be sown to oals be the steps necessary to bring them now played where it can be done; or about. To have your lambs what you if any land is to be sown to clover or would wish them to be, now is the time to begin to care for the ewes. Provide to sow early in the spring. Land to be planted in orchards, if not plowed should be deeply and thoroughly played gow.

Our farmers most learn to practic economy by saving, not wasting, the alarmed, where one gets too fat to brend well twenty get too lean. If a of little or no value. More root crops fleshy ewe should lose her land, she is should be grown, and the straw stack in prime condition for the butcher at attleed instead of being left to rot down for manure, as is still done over large extent of country. Let the steam boder beset up and be more extensively used for preparing food for stock, and better results will surely follow, especially in the older States, where all kinds more likely to weaken than to strengther of farm produce command good prices, on them, which would not be desirable. Few farmers seem to know how little food will keep an animal bealthy and in good flesh, if the little is put in the condition to be all appropriated to the anied,-New York Weekly Sun.

THE HOUSEKEEPER.

D. W. Lawis & Co., New York. ewes not only nave more milk, but it thus writes to the Country Academan in reference to the manner of packing tion, well fed and cared for, will rapse a from food twenty four hours before dressed poultry for that market; "Keep tion, we' fed and cared for, will rarse a pair of twins that will please the butcher. In all flocks of breeding ewes there are those that it is not desirable to keep for that purpose. Now if they are in drawn. Hang all poultry by the legs to the control of the fine condition, it is easy to dispuse of twenty-four hours before packing, them; if the contrary, they are not fit where it will not freeze. (This preto sell or keep. In conclusion let me vents it sweating and looking shppery.) to sell of keep. In concension we or vents it sweating and concing supports are all stock ares ets to held and care. Use straw, clean and free from that well for the ewes, have them in fine put a layer of straw on the bottom of condition if possible, and they will be the package, then alternate layers of analyty rewarded in wood and brubs.—A. straw and poultry, and pack snugly, barks up, and avoid breaking the skin The Press or bones. In very cold weather line the boxes with hardware paper, or wrap ays that one of the tew who have cuch bird in it, which procludes the iso of straw. Different sorts of poultry should not be mixed in the same pack-

age." To Both Edos, - The objection to he is enabled to flow at will, and in the common way of boiling eggs is this: such a way as he likes. Of the twelve The while, under three minutes, rapid acres he has ten set out to cranberry cooking, becomes longh and indirecticooking, becomes tough and indigestihants. The three first years he was at be, while the yolk is still sett. When broperly cooked, eggs are done evenly Buys Gold and Silver lands and the ingenious methods for through like any other food. This re-cultivation and barvesting. Mr. Giles suit may be attained by putting the does not spend time in pucking by hand—ergs into a dish with a cover, as a ta tediens business) but he flows the tin pail, and then pour upon them builbeg, and while it is flowed the berries ing water, two quarts or more to a dec are detached from the years by rakes on eggs, and cover and set away from and finated to a house at the fact of the the stove for fifteen minutes. The heat of the water cooks the eggs slowly and evenly and sufficiently, and to a jully like consistency, leaving the contra contrivance of Mr. Giles, the finit is or yolk harder than the white, and the serted by the sercens and water, the egg tastes as much richer and nicer as a

FRENCH ROLLS. Two quarts of sifted flour, a lump of lard about the size of an egg one a little larger of butter; stir into the flour, the same as n making pastry. When well stirred add blood-warm water, or, preferably, milk and water to mix; add a little salt, bull a teacopful of home made yeast or three tablespoonsful of baker's yeast. Mix in the evening as for bread, and let rise. In the morning shape them with the hand and beard, and let Landa yields of corn are now the or them raise ten or fifteen minutes after putting them in the pans; then lake; litteen mintes will suffice if the oven is sufficiently heated. Good broad may be made in the same way with a proper
